

CLARKS

EXCEED YOUR LIMITATIONS

Engineered for every style of riding in all conditions. Our range is comprehensive, compatible with all the major manufacturers' current and older braking systems. We offer the rider three types of pad compounds. All demonstrate unrivalled stopping power and longevity.

VX [Organic] PERORMANCE

Commuters, Leisure, city, trail
Specifically designed to give the best performance under normal conditions. The organic compound provides, 'pre-bedded in' pads, improves noise reduction and increases 'bite'. Recommended for use with Mechanical Systems.

VRX [Sintered] ENDURANCE

Cross country, downhill
Harder compound pad with increased carbon content, sintered pads are designed to deliver maximum performance under stress and extreme conditions. Consistent through sustained riding they are ideal for hydraulic brake systems.

VRS [Semi-Metallic] DUAL PERFORMANCE

Commuters, off-road, cross country, downhill
Engineered with an advanced pad compound comprising of, Kevlar® for high frictional properties, high ceramic content for improved wet weather performance and a increased copper content for superior low speed braking characteristics.

ALL CLARKS PADS ARE SUPPLIED WITH SPRINGS & SPLIT PINS WHERE APPLICABLE.
